A - Chompers

分值：100 分

Problem Statement

You are given a string S consisting of lowercase English letters and a positive integer N. The length of S is at least $2N+1$.

给定一个由小写英文字母组成的字符串 S 和一个正整数 N。S 的长度至少为 $2N+1$。

Find the string obtained by removing N characters from the beginning and N characters from the end of S.

求将 S 删掉开头 N 个字符、删掉末尾 N 个字符后得到的字符串。

Constraints

- S is a string consisting of lowercase English letters.
- N is an integer.
- $2N+1 \leq |S| \leq 30$
- $1 \leq N \leq 10$
- S 是一个由小写英文字母组成的字符串。
- N 是一个整数。
- $2N+1 \leq |S| \leq 30$
- $1 \leq N \leq 10$

Input

The input is given from Standard Input in the following format:

输入按照以下格式从标准输入给出：

S
N

Output

Output the answer.

输出答案。

Sample Input 1

```
chemotherapy
3
```

Sample Output 1

```
mother
```

Removing the first three characters (`che`) and the last three characters (`apy`) from `chemotherapy` gives `mother`.

将 `chemotherapy` 删掉前三个字符（`che`）和后三个字符（`apy`），得到 `mother`。

Sample Input 2

```
thermometer
4
```

Sample Output 2

```
mom
```

Sample Input 3

```
burger
1
```

Sample Output 3

```
urge
```
