

C - Vanish

分值: 300 分

Problem Statement

You are given an integer sequence $A = (A_1, A_2, \dots, A_N)$.

给定一个整数序列 $A = (A_1, A_2, \dots, A_N)$ 。

Find the minimum possible sum of all elements of A after performing the following operation exactly K times.

你需要恰好执行 K 次下述操作，求操作后 A 的所有元素的最小可能总和。

- Choose an integer x . For each i such that $A_i = x$, replace the value of A_i with 0.
- 选择一个整数 x 。对于每个满足 $A_i = x$ 的 i ，将 A_i 的值替换为 0。

Constraints

- $1 \leq K \leq N \leq 3 \times 10^5$
- $1 \leq A_i \leq 10^9$
- All input values are integers.
- $1 \leq K \leq N \leq 3 \times 10^5$
- $1 \leq A_i \leq 10^9$
- 所有输入值均为整数。

Input

The input is given from Standard Input in the following format:

输入按照以下格式从标准输入给出：

N K

A_1 A_2 $\dots$ A_N

Output

Output the answer.

输出答案。

Sample Input 1

```
6 2
7 2 7 2 2 9
```

Sample Output 1

```
6
```

Initially, $A = (7, 2, 7, 2, 2, 9)$.

初始时, $A = (7, 2, 7, 2, 2, 9)$.

Performing the operation with $x = 9$ gives $A = (7, 2, 7, 2, 2, 0)$.

选择 $x = 9$ 执行操作后, 得到 $A = (7, 2, 7, 2, 2, 0)$.

Next, performing the operation with $x = 7$ gives $A = (0, 2, 0, 2, 2, 0)$.

接下来, 选择 $x = 7$ 执行操作后, 得到 $A = (0, 2, 0, 2, 2, 0)$.

At this point, the sum of all elements of A is $0 + 2 + 0 + 2 + 2 + 0 = 6$.

此时, A 的所有元素之和为 $0 + 2 + 0 + 2 + 2 + 0 = 6$.

Sample Input 2

```
8 6
1 2 3 4 1 2 3 4
```

Sample Output 2

0

Sample Input 3

```
10 2
3 3 4 1 1 3 3 1 5 1
```

Sample Output 3

8
