

A - Closed interval

分值: 100 分

Problem Statement

You are given integers L and R .

给定整数 L 和 R 。

Find how many integers are between L and R , inclusive.

求 L 到 R (包含两端) 之间共有多少个整数。

Constraints

- $1 \leq L \leq R \leq 100$
- All input values are integers.
- $1 \leq L \leq R \leq 100$
- 所有输入值均为整数。

Input

The input is given from Standard Input in the following format:

输入按照以下格式从标准输入给出：

L R

Output

Output the answer.

输出答案。

Sample Input 1

3 5

Sample Output 1

3

The integers between 3 and 5, inclusive, are 3, 4, 5, which is three integers. Thus, output 3.

3 到 5（包含两端）之间的整数为 3, 4, 5，共3个整数。因此输出 3。

Sample Input 2

1 7

Sample Output 2

7

Sample Input 3

14 79

Sample Output 3

66
